

DICHROIC

IRS 226

INSIDE APPLICATION

Rainbow glints

IRIDESCENT FILM

The dichroic film IRS 226 can decorate all your glass surfaces. This iridescent film allows you to give your glass great rainbow reflections.

Durability : from 12 to 15 years for vertical application in central Europe.

Use : Réfectiv window films are designed for use on any type of clear normal glass.

Maintenance after 30 days : with usual cleaning solutions (non-abrasive, without ammonia...). Cleaning products that may scratch the film should be avoided.

Storage : 2 years from delivery. This film should be kept away from excessive humidity and sun rays, at temperatures below 38°C.

In order to constantly improve our production we may change a product colour and manufacturing process without prior notice.

INFORMATION

MATERIAL :PET

Application Method

The glass surface on which you want to apply the film has to be free from dust, grease or other contaminants. Some specific materials such as polycarbonate can cause air bubble problems. Therefore, a compatibility test is recommended. For more precision we recommend to refer back to the application table.

Production and standards

In order to constantly improve our production we may change a product colour and manufacturing process without prior notice. Before applying our products we recommend that our users ensure that the film is suitable for the intended use and comply with current standards.
