

VinylEfx – Metalized Vinyl Media

Description

Coated with a permanent pressure sensitive acrylic adhesive, RTape metalized VinylEfx films exhibit good adhesion to a wide variety of sign substrates. User should determine the suitability of the film prior to use in production. VinylEfx films are hot-embossed to produce deeper and more defined patterns.

Their realistic and distinctive eye-catching appearance duplicates the look of metallic finishes. RTape's decorative series metalized films provide long-term indoor use as well limited outdoor durability. All VinylEfx films are printable using screen print, digital print and offset inks formulated for pressure sensitive vinyl films.

Available from stock in 610mm - certain products available in 1220mm to order.

General Properties:

Adhesive: Acrylic

Caliper Facestock: 2.7 mils (65 micron)

Caliper Facestock + Adhesive: 3.7 mils (90 micron)

Release Liner: one side coated white kraft paper, 143 g/m²

Adhesion to Steel*: 28 N/100mm (25 oz.)

Shelf Life**: 1 year

* Adhesion PSTC-1, 1 minute on stainless steel at time of manufacture.

** Stored at 22°C (72°F)/50-55 % RH
