

# ANTI-GRAFFITIS

# AGM 400

## INSIDE & OUTSIDE

4 X 100 MICRONS

ANTI-GRAFFITIS

**AGM 400 film is a multilayer film** designed for glazing that is highly exposed to **graffiti and other urban damage**. Composed of 4 layers of 100 microns each, you just have to remove the layer when it is deteriorated, in order to get a new glass immediately.

## INFORMATION

**MATERIAL** : .....Polyester multi-layers  
**THICKNESS** : .....4x100 microns  
**COLOR / APPEARANCE** : .....Transparent  
**APPLICATION FACE** : .....Inside and outside  
**DURABILITY** : .....3 years

## SIZE

1,52 x 2,5 m  
 1,52 x 5 m  
 1,52 x 10 m  
 1,52 x 30 m

x4

**Durability** : from 12 to 15 years for vertical application in central Europe.

**Use** : Réfectiv window films are designed for use on any type of clear normal glass.

**Maintenance after 30 days** : with usual cleaning solutions (non-abrasive, without ammonia...). Cleaning products that may scratch the film should be avoided.

**Storage** : 2 years from delivery. This film should be kept away from excessive humidity and sun rays, at temperatures below 38°C.

In order to constantly improve our production we may change a product colour and manufacturing process without prior notice.

### Application Method

The glass surface to be glued on has to be free from dust, grease or other contaminants. Some specific materials such as polycarbonate can cause air bubble problems. Therefore, a compatibility test is recommended. For more precision we recommend to refer back to the application table.

### Production and standards

In order to constantly improve our production we may change a product colour and manufacturing process without prior notice. Before applying our products we recommend that our users ensure that the film is suitable for the intended use and comply with current standards.
